

1.5 Between- and within-state alignment (higher = less traditional)

Between states — family: one point = one state  
 $r = 0.18$  ( $p = 0.204$ ),  $n = 51$

Within states — family: one point = one state-window  
 $r = -0.14$  ( $p = 0.040$ ),  $n = 232$
